SAVE**

# YOUR **SHARESAVE** IS COMPLETE

**Congratulations!**

**Well done on reaching this key milestone, and thank you for regularly saving into Sharesave over the last three years.**

Your 2022 Sharesave has now matured. That means it's time to decide what you'd like to do with your savings.

You can choose to buy Flutter shares at a discounted price, or you can take your money back. Whichever option you choose, the decision is completely yours.

You'll need to make your decision between 2 February and 22:59pm (UK time) 31 July 2026. During this time, you can:

- Check the current Flutter share price
- Explore your options
- Take time to decide what feels right for you

This brochure gives you a clear overview of your options and where to find more information.

# YOUR SHARESAVE AT A GLANCE

Here's a quick reminder of the details of your 2022 Sharesave plan.

You joined and started saving in **January 2023**

Your 2022 Sharesave plan **matures on 1 February 2026\***

Your discounted share price is **£90.52 per share** (20% off the market price when you joined in 2022).

\*Assumes you didn't take a savings break. If you took a savings break, your maturity date will move by one month for each month you took your savings break, up to a maximum of 12 months. If you took a savings break of more than 12 months, your option to acquire shares will have lapsed.

You'll have six months from the maturity date of your 2022 Sharesave to decide whether to buy Flutter shares at your discounted share price or take your money back. See page 4, Your Options, for more on this.

## **A reminder: where your savings are held**

Your savings are held in a bank account operated by Flutter.

## **GOOD NEWS!**

As at 31 January 2026, the market price of Flutter shares was higher than your discounted share price.

If it remains higher than your discounted price, you have the opportunity to make a profit from Sharesave! You can check our current share price [here](#).

# YOUR OPTIONS

**You've finished saving – but it's not the end! Now it's time to decide what to do with your savings.**

**1.**

---

## **Buy shares at the discounted price and keep some of them (Sell to cover)**

Become a Flutter shareholder – when Flutter grows, the value of your shares could grow further too. You decide if and when to sell your shares in the future. You will sell enough shares to cover the cost of buying the shares and fees.

**2.**

---

## **Buy shares at the discounted price and sell them straight away (Exercise and sell)**

If our share price is higher than £90.52, you could make a gain and profit from our success immediately – subject to fees. Funds will reach you in 2-5 working days.

**3.**

---

## **Take back your savings as cash in full (Withdraw)**

Personal circumstances or market conditions may mean that buying shares isn't right for you this time. Make your money work for you in other ways!

### **What happens if I don't make a decision within the six-month window?**

If you don't take any action by 22:59pm (UK time) 31 July 2026, you will lose the opportunity to buy Flutter shares at your discounted price. You'll still get all your savings back, but you will no longer be able to buy shares.

### **What happens if I leave (or have left) Flutter?**

If you leave Flutter due to retirement, ill health, disability or redundancy, you'll usually have six months from the earlier of your maturity date or your leaving date to decide what to do with your Sharesave.

If you resign or are dismissed before your maturity date, you'll usually lose the option to buy shares, and have your savings returned to you.

# BUY SHARES AT THE DISCOUNTED PRICE AND **KEEP SOME OF THEM**

**Buy Flutter shares at your discounted share price of £90.52 per share and keep some of them.**

As part of the transaction, enough shares will be sold to cover the cost of buying the shares (option costs). The savings you have made are not used to buy your shares and they will be returned to you separately.

By choosing this option, you'll become a Flutter shareholder. You'll own part of the business and can benefit if the value of Flutter shares increases over time. You'll also be able to vote at our AGMs which gives you the opportunity to have your say in Flutter's future. You can even choose to transfer your shares to your spouse or partner.

You can sell your shares whenever you like - just remember that the value of your shares can go down as well as up. You can track the performance of your shares in your EquatePlus account.

## What you need to know

You don't pay any tax when you buy your Sharesave shares.

There will be some dealing fees to pay when you sell your shares (0.35% of gross proceeds subject to a minimum of £25). These fees are deducted automatically from any proceeds you make.

Your savings will be returned to you 4-6 weeks after your exercise via your payroll.

# BUY SHARES AT THE DISCOUNTED PRICE AND **SELL THEM** STRAIGHT AWAY

**Buy Flutter shares at your discounted share price of £90.52 per share and sell them immediately.**

If the market price of Flutter shares is higher than your discounted share price when you sell them, you could make a profit from Sharesave straight away.

As part of the transaction, enough shares will be sold to cover the cost of buying the shares (option costs). The savings you have made are not used to buy your shares and they will be returned to you separately.

Once your shares are sold, the proceeds (after the cost of buying the shares (option costs) and fees) will be paid directly into your bank account, usually within 2-5 working days.

## What you need to know

You won't have to pay Income Tax, CGT or National Insurance on any gain you make when you sell your shares, because Sharesave is tax approved in the Isle of Man.

There will be some dealing fees to pay when you sell your shares (0.35% of gross proceeds subject to a minimum of £25). These fees are deducted automatically from any proceeds you make.

Your savings will be returned to you 4-6 weeks after your exercise via your payroll.

# TAKE BACK YOUR SAVINGS AS **CASH IN FULL**

You can simply choose to take back all the money you've saved over the last three years. You'll need to make your request by logging into your EquatePus account.

## What you need to know

You'll receive all of your Sharesave savings back in full.

Your savings will be returned to you 4-6 weeks after your exercise via your payroll.

There's no tax to pay when you take your savings back.

Taking your savings back is a simple and risk-free option, but it does mean missing out on the opportunity to buy Flutter shares at a discounted price and, if the market price of Flutter shares is higher than your discounted share price, benefiting from any share price increase.

# HELPING YOU MAKE YOUR DECISION

**Not sure what to do  
with your savings?**
